## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-4, 6, 7, 27 and 28 are rejected under 35 U.S.C. 102(a and e) as being clearly anticipated by Stein et al.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 2167

Claims 5, 8-26 and 29-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stein et al. in view of either Gopinathan et al. or Anderson et al. U.S. Patent 6,094,643.

As noted above, Stein et al. teach essentially all the elements of the claim invention. However, the reference to Stein et al. is silent on the particular method that evaluates the payment method. On the other, both Gopinathan et al. and Anderson et al. teach using weighted numeric evaluation to determine whether a payment is valid or fraudulent. Accordingly, to use the evaluation system of either Gopinathan et al. or Anderson et al. in the card validity determination of Stein et al. would have been obvious for one having ordinary skill in the art at the time of the invention. The motivation for this modification would have accelerated the detection process in the evaluation of the payment by the buyer in the Stein et al. system.

### ***Response to Arguments***

With respect to the argument that the Office action is insufficient under MPEP 706 because the rejections do not provide the applicants the opportunity to ascertain the true scope of the rejection, the examiner is of another opinion. The rejection of claims 1-4, 6, 7, 27 and 28 under 35 U.S.C. 102(a and e) as being clearly anticipated by Stein et al., requires no further explanation is necessary. MPEP 706 requires:

After the application has been read and the claimed invention understood, a prior art search for the claimed invention is made. With the results of the prior art search, including any references provided by the applicant, the patent application should be reviewed and analyzed in conjunction with the state of the prior art to determine whether the claims define a useful, novel, nonobvious, and enabled invention that has been clearly described in the specification. The goal of examination is to clearly articulate any rejection early in the prosecution process so that the applicant has the opportunity to

Art Unit: 2167

provide evidence of patentability and otherwise reply completely at the earliest opportunity. The examiner then reviews all the evidence, including arguments and evidence responsive to any rejection, before issuing the next Office action. Where the examiner determines that information reasonably necessary for the examination should be required from the applicant under 37 CFR 1.105, such a requirement should generally be made either prior to or with the first Office action on the merits and should follow the procedures in MPEP § 704.10 et seq.

It is clear that the examiner has performed all these functions. On the other hand, applicant has failed to meet the requirements of 37 C.F.R. § 1.111(c). A rejection based on 35 U.S.C. 102(e) can be overcome by:

(A) Persuasively arguing that the claims are patentably distinguishable from the prior art;

(B) Amending the claims to patentably distinguish over the prior art;

(C) Filing an affidavit or declaration under 37 CFR 1.132 showing that the reference invention is not by "another." See MPEP § 715.01(a), § 715.01(c), and § 716.10;

(D) Filing an affidavit or declaration under 37 CFR 1.131 showing prior invention, if the reference is not a U.S. patent (or application in the case of a provisional rejection) claiming the same patentable invention as defined in 37 CFR 1.601(n). See MPEP § 715 for more information on 37 CFR 1.131 affidavits. When the claims of the reference and the application are directed to the same invention or are obvious variants, an affidavit or declaration under 37 CFR 1.131 is not an acceptable method of overcoming the rejection. Under these circumstances, the examiner must determine whether a double patenting rejection or interference is appropriate. If there is a common assignee or inventor between the application

and patent, a double patenting rejection must be made. See MPEP § 804. If there is no common assignee or inventor and the rejection under 35 U.S.C. 102(e) is the only possible rejection, the examiner must determine whether an interference should be declared. See MPEP Chapter 2300 for more information regarding interferences;

(E) Perfecting a claim to priority under 35 U.S.C. 119(a)-(d). The foreign priority filing date must antedate the reference and be perfected. The filing date of the priority document is not perfected unless applicant has filed a certified priority document in the application (and an English language translation, if the document is not in English) (see 37 CFR 1.55(a)(3)) and the examiner has established that the priority document satisfies the enablement and description requirements of 35 U.S.C. 112, first paragraph; or

(F) Perfecting priority under 35 U.S.C. 119(e) or 120 by amending the specification of the application to contain a specific reference to a prior application or by filing an application data sheet under 37 CFR 1.76 which contains a specific reference to a prior application in accordance with 37 CFR 1.78(a).

A rejection based on 35 U.S.C. 102(a) can be overcome by:

- (A) Persuasively arguing that the claims are patentably distinguishable from the prior art;
- (B) Amending the claims to patentably distinguish over the prior art;

(C) Filing an affidavit or declaration under 37 CFR 1.131. See MPEP § 715 for information on the requirements of 37 CFR 1.131 affidavits.

(D) Filing an affidavit or declaration under 37 CFR 1.132 showing that the reference invention is not by "another." See MPEP § 715.01(a), § 715.01(c), and § 716.10;

(E) Perfecting a claim to priority under 35 U.S.C. 119(a)-(d) as explained in reference to 35 U.S.C. 102(e) above;

(F) Perfecting priority under 35 U.S.C. 119(e) or 120 by amending the specification of the application to contain a specific reference to a prior application or by filing an application data sheet under 37 CFR 1.76 which contains a specific reference to a prior application in accordance with 37 CFR 1.78(a).
